Commitment statement

Policy Statement	VETTER is committed to respecting human rights and protecting the environment. This commitment applies both to our own operations and throughout our supply chain. We expect all employees to act in accordance with our Code of conduct and Corporate Corporate Mission Statement and to comply with all applicable regulations and policies. Furthermore, we require our business partners and suppliers to adhere to our Supplier Code of Conduct.
VETTER-Compliance Management-System (CMS)	Compliance means the consistent observance of all applicable laws, regulations, and company policies. These requirements are not only the basis of our corporate objectives and strategies but are also a fundamental element of VETTER's corporate culture. Our principle is clear: we do not tolerate any form of corruption or bribery, antitrust violations, human rights abuses, breaches of anti-money laundering regulations, violations of foreign trade regulations, or any other breaches of applicable legal requirements. To ensure continuous compliance with these high standards, we maintain structured coordination of all relevant compliance measures and provide regular training programs. These activities are firmly integrated into our Compliance Management System (CMS), ensuring that all employees understand and responsibly implement applicable regulations.

Material compliance

REACH	We do not place on the market substances or mixtures containing substances from the Candidate List in accordance with Article 33 of the REACH Regulation. Therefore, we are not subject to the obligation to register products in the ECHA SCIP database. According to REACH Regulation (EC) No. 1907/2006, Article 3(3), our products are classified as articles. Pursuant to Article 33 of REACH, suppliers of articles must inform customers if an article contains a substance from the REACH Candidate List (SVHC List) at a concentration above 0.1% by weight. On June 27, 2018, lead (CAS: 7439-92-1 / EINECS: 231-100-4) was added to the SVHC Candidate List. We hereby inform you that the following components used in our products may contain lead in concentrations above 0.1% (w/w): • CEE connectors • Cable glands (brass) • Gearboxes • Electric motors • Slip ring assemblies • Deep groove ball bearings When used as intended, no substances are released from our products.
-------	--

RoHS/ WEEE	Following a detailed assessment of Directive 2012/19/EU (WEEE2) and Directive 2011/65/EU (RoHS2), we consider our products to be outside the scope of these directives, as they qualify as large-scale stationary industrial tools or fixed industrial installations.
Conflict Minerals	We confirm that our products comply with all requirements of the current Conflict Minerals Regulations (EU Regulation 2017/821 and Dodd-Frank Act Section 1502) and are free from conflict minerals.
